

Toronto Geological Discussion Group

Winter Workshop and Mini-Symposium on the Complexities of Gold Grade Estimation

In collaboration with ioGlobal,
the TGDG invites you to attend two events:

• **Workshop** on **‘Why can’t the lab reproduce my gold assays?’**
Selecting assay methods; measuring uncertainty associated with pulp, prep and core duplicates; selection bias and the problem with check assays. Presented by **Lynda Bloom**, a consulting geochemist and specialist in assaying, quality control and sampling statistics, in association with ioGlobal Pty. Ltd.

• **Mini-symposium** on **‘Why are they cutting my ounces?’**
Selected presentations and a panel discussion on capping practices in resource estimation and alternative approaches including:
William E. Roscoe of RPA, author of numerous technical reports with 30 years of experience in mineral resource estimation.

R. Mohan Srivastava of FSS Canada, an expert on resource estimation, especially for complex mineral deposits and co-author of *An Introduction to Applied Geostatistics*.

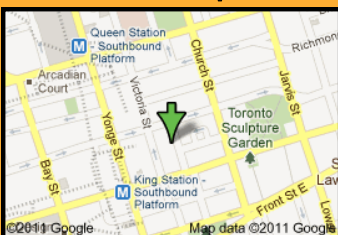

Oy Leuangthong, senior geostatistician with SRK Consulting, specializing in the application of conditional simulation in resource modeling.

James Whyte, senior geologist at the Ontario Securities Commission, specializing in reviewing corporate disclosure for compliance with securities legislation and rules.

Fran Manns, senior manager, Compliance & Disclosure, Mining with the Toronto Stock Exchange.

Location Map

OBA Conference Centre
20 Toronto Street
Toronto
